Title: 信号的自变量变换 Date: / /

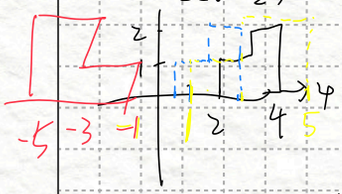

① 化成标准形式
② 首先有负号都翻转
③ |系数|>1 压缩，|系数|<1 拉伸
④ 左加右减

已知$x(t)$的波形如图所示，画出$x(-\frac{1}{2}t+1)$的波形

⇒

若已知 $x(-\frac{1}{2}t+1)$，则令 $u=-\frac{1}{2}t+1 \Rightarrow t=?$ 反推 $x(t)$

$$x[n]=\sum_{k=-\infty}^{+\infty}x[k]\delta[n-k]$$
